

Intelligent pool systems.

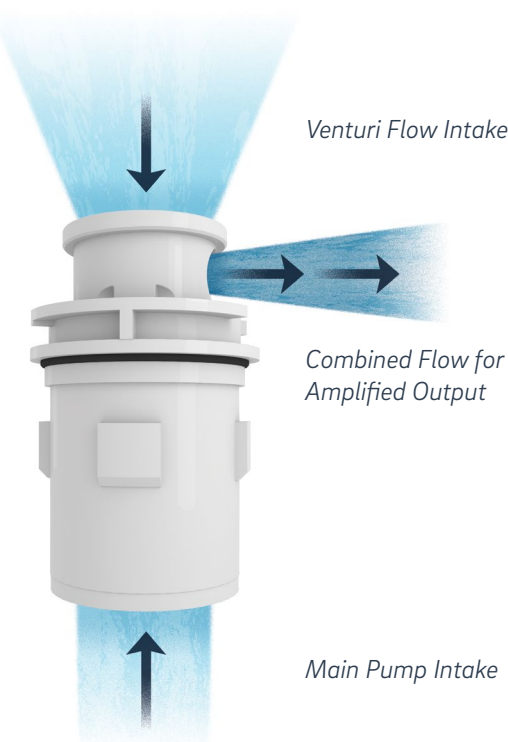

Less hassle.
More time for you.

QuikClean[®]
XTREME[™]

In-floor cleaning and circulation system.

Experience an effortlessly healthy pool.

A pool isn't clean unless it's well-circulated.

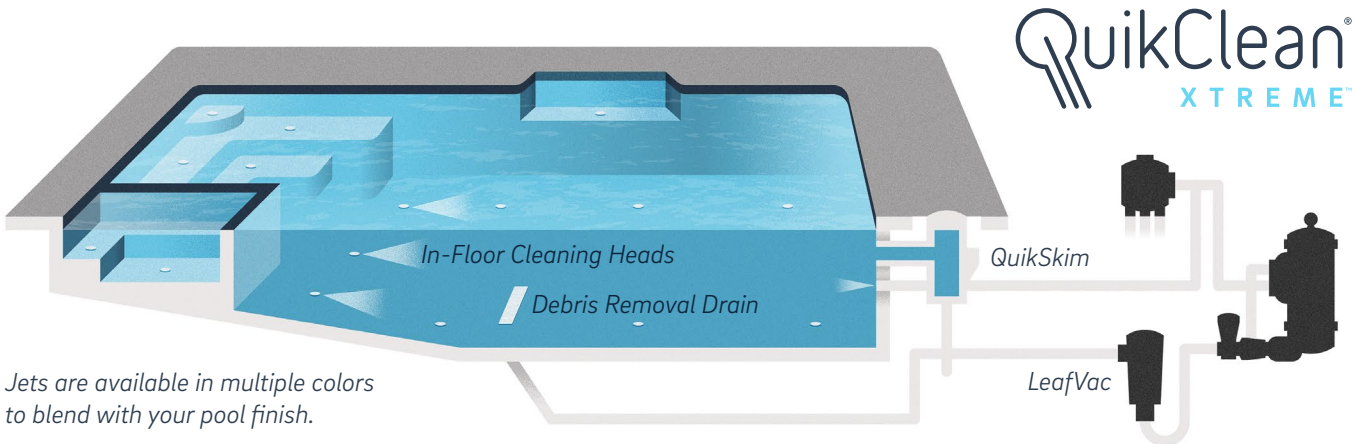

The key to maintaining pristine, clear, and healthy pool water is an effective cleaning and circulation system. The QuikClean Xtreme sanitizes, eliminates cold pockets, reduces heat loss, and ensures an even dispersment of chemicals—all by itself. This means more time saved, more money saved, and more of your life spent enjoying your pool.

A well-circulated pool uses less energy and requires fewer chemicals to maintain, meaning the QuikClean Xtreme in-floor system is not only better for your family, but also for the environment.

More cleaning power than any other jet.

QuikClean Xtreme uses a series of strategically positioned cleaning heads on your pool floor, steps, and benches to direct chemicals, circulate water, and remove debris. With a programmed 360° rotation, these jets leave no area of your pool untouched. They fully retract into your pool floor, making them nearly invisible when not active.

What truly sets A&A's QuikClean Xtreme apart is its venturi-powered head design. By drawing in more water than standard cleaning heads, it harnesses added flow power to give your pool superior cleaning strength at no extra cost.

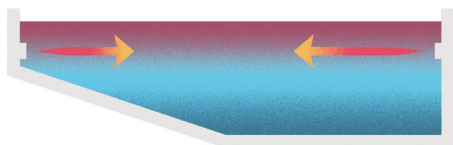

Jets are available in multiple colors to blend with your pool finish.

Even better together.

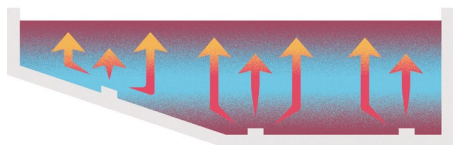

Experience the most advanced pool cleaning and circulation system available. When combined with the **QuikSkim** venturi-powered skimmer, oversized **LeafVac** debris container, and large **AVSC** or smaller **PDR2** debris removal drains, the QuikClean Xtreme system is unmatched in its delivery of a meticulous, top-to-bottom clean.

Discover the joy and ease of a self-cleaning pool that is faster, more powerful, and more effective than any other.

Conventional systems only move water at the surface, creating cold spots and poor sanitization.

A&A circulation systems efficiently distribute clean, heated water evenly for a fully enjoyable experience.

23%

More powerful water flow at no additional energy cost.

33%

Wider coverage than a standard cleaning head means fewer are needed.

QuikClean is good for your pool, for the environment, and for your wallet.

Circulates water completely for a cleaner, healthier, more enjoyable pool.

Reduces chemical use by dispersing them more efficiently.

Saves heating costs by introducing water at the pool floor for an even temperature.

Significantly reduces energy usage when combined with variable speed pumps.

Easily retrofits to many existing in-floor cleaning systems.

The most powerful and efficient in-floor cleaning and circulation system available.

Intelligent pool systems.

When it comes to pool cleaning, circulation, and safety, A&A Manufacturing is the leading developer of innovative, time-saving products. Since 1982, we've delivered what pool professionals and owners want most—a safe, clean pool that requires virtually no effort to maintain.

A&A products are a direct outgrowth of valued feedback from pool professionals and owners, intensive real-world field research, and experience gathered from our pool building roots.

We are committed to providing you with the most intelligent pool systems by offering technologically advanced, eco-friendly, and family-friendly products that create a pool experience second to none.
